

# Why are Millionaires with Wood FIR Saunas in their homes — buying the Relax Sauna?

Many people with \$5,000 Wooden Infrared sauna have switched to the \$1,300 Relax FIR Sauna... and found zero use for their old sauna except as a storage space. These people were reluctant to try the Relax Sauna, because (at first) it doesn't look like it belongs in an expensive home or office (**looks are deceiving**). When someone used to a wooden FIR sauna gets into the Relax Sauna and feels the difference, they are amazed with the feeling they experience in the Relax FIR Sauna... including how quickly it heats up (30 seconds).

The Relax Sauna emits over 95% pure FAR INFRARED RAY ENERGY, whereas the amount of pure Far Infrared Energy that all other Infrared saunas emit is between 25% and 60%. You don't need to preheat the Relax Sauna. You can feel it "instantly." The patented semi-conductor chips , which took 10 years to invent, filter out the non-healing frequencies that do not penetrate the body. Only the **penetrating far infrared rays** are able to cause the water molecules in the body to pulsate. That is one of the reasons why the Relax Sauna feels so much better. The silver tent acts as a mirror for the FIR light, and that is why you get an EVEN Distribution of the Healing Light throughout your whole body.

## What do Relax Sauna owners most like about the Relax Sauna?

1. In the Relax Sauna, **you keep your head out.**
2. In the Relax Sauna, **you can keep your hands out** so you can read a book without accumulating sweat on the book.
3. The Relax Sauna has a **small foot print** (32" by 33").
4. The Relax Sauna is **portable**. You can carry it over your shoulder in its carrying bag or it very easily fits into a suitcase.
5. You feel the far Infrared light in **30 seconds** and have a profuse sweat in **20 minutes**.
